

Do you want to sell a two-bedroom apartment in Gaeta? This is the right time!

“I can’t sell my house” is the phrase that has been heard more and more often in recent years. But now the music is changing, especially if you have a **three-room apartment**. Yes, you got it right. You don’t believe it? It has been confirmed by surveys conducted in recent years in Italy which have revealed a preference for two-bedroom apartments, then **three-bedroom apartments**, followed by one bedroom apartments. The parameters taken into consideration were precisely the type of house, the number of rooms, the size, the prices and the regions.

The demand for houses highlights first of all that in Italy the **apartment** is the type of house most sought, and more specifically, that the Italians prefer the **two bedroom apartment**. In fact, it is a type of home that can satisfy different types of needs, and is a good compromise for everyone.

Among other things, in recent years our company has seen numerous changes: the decrease in **property prices** and demographic changes have necessarily led to a change in the type of research by buyers.
